

## MESSAGE FROM PRINCIPAL

### CLARETINE EDUCATION FOR GLOBAL CITIZENSHIP

Our mission statement speaks of education for global citizenship. From the vision point of view, it means that we foster in our students respect for all people, create among them a sense of humanity and help them become accountable and engaged global citizens. We equip students with the skills necessary to take on active roles in addressing global issues in order to create a safe, tolerant, and peaceful world and contribute to its just and sustainable development. It is not just enough for education to produce people who can read, write, and count. Education should equip students with the knowledge, abilities, and moral principles necessary to collaborate in addressing the burning problems of the 21st century, such as poverty, hunger, conflict, climate change, and concerns of equality and sustainability. And at the same time, education should also provide students with the skills they need to succeed in the job market of the twenty-first century.

From an economic point of view, education for global citizenship signifies India's huge potential to take on the world. India's 1.3 billion people makes it the second most populous country in the world, and with an average age of 29, India has one of the youngest populations globally. If this vast resource of young citizens can be trained with adequate knowledge and skills as per global standards, we will leverage this advantage in the global job market.

Our educational pedagogy is going through a transformation to match the global standards. We are expanding our wings to incorporate blended learning methods wherein, equal focus is given on the theoretical and practical aspects of education. We regularly organize industry visits, seminars with subject matter experts and industry experts. Furthermore, our teaching pedagogy is curated in a way that helps students develop logical and analytical thinking.

We are committed to providing education on par with international standards and we are initiating exchanges and collaborations teaching- learning, research and consultancy with well-known institutions both inside and outside India. SCC's A+ NAAC accreditation grade, several university ranks, high ratings in several national surveys and student achievements at the state and national levels vouch for the high quality of education we impart. Let us continue our onward journey of constantly reinventing ourselves and recreating our world.
