VI. Read the following passage and answer the questions set on it : **(5×1=5)**

Our Defence service consists of three wings – Army, Navy and Air Force. As a matter of fact, the Navy and Air Force happen to support the Army in any operation. It is only the Army that can capture and hold the enemy land . Navy and Air Force can bombard the enemy areas and bring about destructions and damages to their war materials or industries. The Air Force can destroy bunkers and enemy tanks in the battle area, thus help the Army to advance, neutralize the enemy's firepower and occupy ground.

The Navy controls our waters and the coasts. They ensure that no enemy forces enter our land through the seas. Navy does not have the capability to capture land except for the immediate area around a harbor. Like the Air Force, the Navy also has fighter, bomber and reconnaissance aircrafts besides powerful guns that can fire up to 30 miles or so. This is a common factor between the Army and the Navy.

Air Force can drop bombs at long distances but the air crafts have to physically fly closer to the concerned area. Not so with the Army and the Navy; without even seeing the enemy target their guns could fire at them.

In modern times, instead of guns all the three services use Missiles. Missiles are the weapons which have long ranges – some up to thousands of kilometers. Without seeing the target, the missiles could be fired from our own area into enemy land very accurately.

- 1) Which are the three wings of our Defence service ?
- 2) What is the common factor between the Army and the Navy ?
- 3) How does the Navy function ?
- 4) What are Missiles ?
- 5) How does the Air Force neutralize the enemy's firepower ?
